Education

University College London
September 2021 - June 2024

Degree: Computer Science, BSc

Doha British School
2014 - 2021

International Baccalaureate: 44 points (math, biology, chemistry, English, ITGS, French)

IGCSEs: 9 Grade 9/A** and 1 Grade 8/A* (biology, chemistry, physics, mathematics, English literature, English language, French, geography, computer science & business)

Experience

Downtown Doha, Co-Founder & Lead Translator
2019- PRESENT

Student-led organization to provide essential resources to migrant construction workers in Qatar. Raised over 10,000 Qatari Riyals. Assembled donation packages for over 100 workers based on their needs. Arranged multiple visits to the worker living areas to distribute resources throughout the year. Trained lower year students to inherit the operation once we graduated. Received 2nd place in the Global Acts with Impact Award at The Hague International Model United Nations conference for our contributions.

Qatar Invents at Texas A&M University, Researcher
2019 – 2020

Selected to be a part of an intensive STEM program at Texas A&M University. Created to help solve the water crisis in Qatar following the diplomatic crisis. Created working prototypes of hydroponics systems tailored to Qatar's environmental needs and space limitations. Received an award as recognition of my collaboration and leadership skills.

Carnegie-Mellon University Game Developer Hub, Game Developer
2020 - 2021

Personally invited to be 1 of 30 students to form Qatar's first game developer conference. Learned how to create games in Java. Created sprites, conceived of game mechanics and levels. Marketed & published the game under the title of "ReKindle!" on itch.io. Helped expand the scope of the project with Carnegie-Mellon and helped host and manage Qatar's first ever game jam.

DBS KIPR Botball Team, Founder, Lead Programmer
2019 - 2020

Create and led a team to participate in the KIPR Botball robotics competition in Qatar. Taught team members how to program in C and helped design and create a robot that

was capable of pathfinding, sorting blocks based on color etc.

Priya's Cookbook, Web Developer
2019-2020

Worked with a client to create a fully-featured recipe website. Designed responsive layout, logos. Coded in JavaScript & HTML from scratch to accommodate client's needs. Features over 30 of the client's favorite recipes.

Evolution Sports Academy, Assistant Basketball Coach
2019 - 2021

Was responsible for coaching a group of 15+ 9-12 year-olds. Created and demonstrated drills. Taught basketball strategy and acted as a secondary coach during games. Helped 2 kids move to an advanced class.

Kavre Deaf School Nepal, Volunteer
2019-2020

Fundraised and donated over 3000 Qatari Riyals to school management. Responsible for plastering, cleaning and painting 5 classrooms and boarding rooms. Learnt basic Nepalese Sign Language. Helped teach 30+ children written English at a 5th grade level.

Ooredoo 2020 Half-Marathon, Advocate and Runner
2020

Started a marathon club to participate in the Ooredoo 2020 Half-Marathon and raise awareness of the obesity epidemic in Qatar. Created custom training plans for members and monitored weekly progress. Had the distinction of being the youngest group to complete the marathon. Relayed our experience to students from several schools to encourage children to lead an active lifestyle in Qatar.

Awards

2020: Winner of prestigious Carnegie-Mellon Qatar Pi Day Math competition
2020: 2nd place winner- The Hague International Model United Nations Global Acts with Impact Award
2019: Pearson International GCSE High Achiever's Award for exceptional GCSE grades
2018: Winner of Qatar National Scratch Coding Competition

Interests: Computer Science, Computer Security, Advocacy
