

Aaryaman Sharma

+4407984946199 aaryaman1409@gmail.com aaryaman.uk London, United Kingdom

Education

University College London (UCL)

BSc Computer Science, First-Class Honours

Sept 2021 – June 2024

London, United Kingdom

- Relevant Modules: Systems Engineering, Algorithms, Security, Financial Management
- Dissertation: *"Generating Novel Motions Based on a Single Training Example"*

Experience

Software Engineer Intern

Expedia Group

June 2023 – Sept 2023

London, United Kingdom

- Engineered a performance analytics tool for web applications in Node.js, enabling measurement of core web vitals and automating the blocking of GitHub pull requests upon degradation detection
- Implemented anomaly detection, reducing false positive rates of performance degradations by 20
- Enhanced logs by providing performance improvement suggestions based on specific degradation causes
- Designed a front-end prototype in Figma to visualize performance history over time and led cross-departmental demos to assess suitability and gather feedback
- Developed a front-end using native web components with Google Lit and deployed it for internal company use

Software Engineer Intern

Qatar Museums

June 2022 – Sept 2022

Doha, Qatar

- Developed a user-friendly GUI tool in Python for staff to efficiently manage digital assets, metadata, manifest files, and data imports
- Integrated functionalities for sending email notifications upon job completion, enhancing communication and workflow efficiency
- Contributed to asset knowledge mining tool by testing object detection for museum artwork using YOLOv5

Projects

WebGL 3D Shader

- Developed a 3D shader from scratch in GLSL, implementing Ray Tracing, Rasterization, and Path Tracing techniques
- Enabled real-time visualization of advanced rendering methods directly in the browser
- Incorporated real-time animation to demonstrate path-tracing progress and animated ray-traced objects

Touchless Kiosks

- Designed and developed a touchless hospital kiosk interface using MediaPipe and React, enabling hand gesture input for webpage navigation
- Implemented touchless navigation and live gesture previews, with a WebExtension frontend for seamless integration
- Demonstrated the system at Great Ormond Street Hospital and incorporated feedback to enhance accessibility features
- Enabled installation as a browser sidebar extension, showcasing live previews of user gestures and interactions

Jellyfin Plugin

- Developed an artwork and metadata scraping plugin in C# and JavaScript for the open-source media library manager Jellyfin
- Collaborated with open-source contributors on GitHub, discussing feature requests, implementations, and managing pull requests

Set Permutation Generator

- Built a Django-based revision tool for discrete math students to generate and analyze set permutations in Cauchy's two-line notation
- Enabled functionality to compute the order, sign, and cyclic form of permutations, providing detailed problem-solving capabilities

Skills

Languages: Python, JavaScript, TypeScript, C#, Java, C, GLSL, HTML, CSS

Frameworks/Libraries: React, Node.js, Lit, Django, Flask

Development: Git, SQL, PostgreSQL, Docker, Figma
